Contents

NUMBER 1

1 *Pascal Bertran, Bernard Hétu, Jean-Pierre Texier and Henk Van Steijn.* Fabric characteristics of subaerial slope deposits
17 *Carlos H. L. Bruhn and Roger G. Walker.* Internal architecture and sedimentary evolution of coarse-grained, turbidite channel–levee complexes, Early Eocene Regência Canyon, Espírito Santo Basin, Brazil
47 *A. Colella and R. N. Hiscott.* Pyroclastic surges of the Pleistocene Monte Guardia sequence (Lipari Island, Italy): depositional processes
67 *Jianjun Zeng and Donald R. Lowe.* Numerical simulation of turbidity current flow and sedimentation: I. Theory
85 *Jianjun Zeng and Donald R. Lowe.* Numerical simulation of turbidity current flow and sedimentation: II. Results and geological applications
105 *R. G. Maliva and J. A. D. Dickson.* Ulster White Limestone Formation (Upper Cretaceous) of Northern Ireland: effects of basalt loading on chalk diagenesis
113 *Thomas J. McCahon and Keith B. Miller.* Climatic significance of natric horizons in Permian (Asselian) palaeosols of north-central Kansas, USA
127 *J. M. T. Stam.* On the modelling of two-dimensional aeolian dunes
143 *Stelios Nicolaides.* Marine-derived dolomite in the shallowly buried temperate Port Campbell Limestone (Miocene), Otway Basin, Australia
159 *I. Zamarreño, P. Anadón and R. Utrilla.* Sedimentology and isotopic composition of Upper Palaeocene to Eocene non-marine stromatolites, eastern Ebro Basin, NE Spain
177 *P. Nielsen, R. Swennen, J. A. D. Dickson, A. E. Fallick and E. Keppens.* Spheroidal dolomites in a Visean karst system – bacterial induced origin?
196 Forthcoming papers

NUMBER 2

197 *Paul J. McCarthy, I. Peter Martini and Dale A. Leckie.* Anatomy and evolution of a Lower Cretaceous alluvial plain: sedimentology and palaeosols in the upper Blairmore Group, south-western Alberta, Canada
221 *Imran A. Khan, John S. Bridge, John Kappelman and Regan Wilson.* Evolution of Miocene fluvial environments, eastern Potwar plateau, northern Pakistan
253 *John Bridge and Jim Best.* Preservation of planar laminae due to migration of low-relief bed waves over aggrading upper-stage plane beds: comparison of experimental data with theory
263 *Scott L. Nichol, Brian A. Zaitlin and Bruce G. Thom.* The upper Hawkesbury River, New South Wales, Australia: a Holocene example of an estuarine bayhead delta
287 *Brian Jones and Robin W. Renaut.* Formation of silica oncoids around geysers and hot springs at El Tatio, northern Chile
305 *T. Mulder, B. Savoye and J. P. M. Syvitski.* Numerical modelling a mid-sized gravity flow: the 1979 Nice turbidity current (dynamics, processes, sediment budget and seafloor impact)
327 *Jan Alexander and Chris Fielding.* Gravel antidunes in the tropical Burdekin River, Queensland, Australia
339 *M. R. Gibling and S. K. Tandon.* Erosional marks on consolidated banks and slump blocks in the Rupen River, north-west India
349 *Michael J. Zaleha.* Fluvial and lacustrine Palaeoenvironments of the Miocene Siwalik Group, Khaur area, northern Pakistan
369 *Michael J. Zaleha.* Intra- and extrabasinal controls on fluvial deposition in the Miocene Indo-Gangetic foreland basin, northern Pakistan
391 *Zoran Kilibarda and David B. Loope.* Jurassic aeolian oolite on a palaeohigh in the Sundance Sea, Bighorn Basin, Wyoming
405 Forthcoming papers

NUMBER 3

407 *J. E. A. Marshall and B. J. Stephenson.* Sedimentological responses to basin initiation in the Devonian of East Greenland
421 *C. J. R. Braithwaite and Giancarlo Rizzi.* The geometry and petrogenesis of hydrothermal dolomites at Navan, Ireland
441 *José M. Martin, Juan C. Braga and Robert Riding.* Late Miocene *Halimeda* alga-microbial segment reefs in the marginal Mediterranean Sorbas Basin, Spain
457 *J. Torres, L. Droz, B. Savoye, E. Terentieva, P. Cochonat, N. H. Kenyon and M. Canals.* Deep-sea avulsion and morphosedimentary evolution of the Rhône Fan Valley and Neofan during the Late Quaternary (north-western Mediterranean Sea)
479 *P. Blanchon and B. Jones.* Hurricane control on shelf-edge-reef architecture around Grand Canyon
507 *J. N. J. Visser.* Deglaciation sequences in the Permo-Carboniferous Karoo and Kalahari basins of southern Africa: a tool in the analysis of cyclic glaciomarine basin fills
523 *M. Konert and J. Vandenberghe.* Comparison of laser grain size analysis with pipette and sieve analysis: a solution for the underestimation of the clay fraction
537 *A. Strasser and C. Strohmenger.* Early diagenesis in Pleistocene coral reefs, southern Sinai, Egypt: response to tectonics, sea level and climate
559 *Y. Yang and A. C. Aplin.* A method for the disaggregation of mudstones
563 *Paul Enos, Wei Jiayong and Yan Yangji.* Facies distribution and retreat of Middle Triassic platform margin, Guizhou province, south China
585 Forthcoming papers

NUMBER 4

587 *R. B. MacNaughton, R. W. Dalrymple and G. M. Narbonne.* Early Cambrian braid-delta deposits, MacKenzie Mountains, north-western Canada
611 *I. J. Fairchild, G. Einsele and T. Song.* Possible seismic origin of molar tooth structures in Neoproterozoic carbonate ramp deposits, north China
637 *G. H. Mack, D. W. Love and W. R. Seager.* Spillover models for axial rivers in regions of continental extension: the Rio Mimbres and Rio Grande in the southern Rio Grande rift, USA
653 *S. Critelli, E. Le Pera and R. V. Ingersoll.* The effects of source lithology, transport, deposition and sampling scale on the composition of southern California sand

673 *M. R. Caudill, S. G. Driese and C. I. Mora.* Physical compaction of vertic palaeosols: implications for burial diagenesis and palaeo-precipitation estimates
687 *H. C. Jenkyns and C. J. Clayton.* Lower Jurassic epicontinental carbonates and mudstones from England and Wales: chemostratigraphic signals and the early Toarcian anoxic event
707 *E. Insalaco, A. Hallam and B. Rosen.* Oxfordian (Upper Jurassic) coral reefs in Western Europe: reef types and conceptual depositional model
735 *B. J. Willis.* Architecture of fluvial-dominated valley-fill deposits in the Cretaceous Fall River Formation
759 *R. J. G. Mortimer, M. L. Coleman and J. E. Rae.* Effect of bacteria on the elemental composition of early diagenetic siderite: implications for palaeoenvironmental interpretations
767 *M. El-Tabakh, R. Riccioni and B. C. Schreiber.* Evolution of late Triassic rift basin evaporates (Passaic Formation): Newark Basin, Eastern North America
791 Forthcoming papers

NUMBER 5

793 *E. F. F. Sturkell and J. Ormö.* Impact-related clastic injections in the marine Ordovician Lockne impact structure, Central Sweden
805 *S. T. Abbott.* Mid-cycle condensed shellbeds from mid-Pleistocene cyclothems, New Zealand: implications for sequence architecture
825 *V. P. Wright, S. D. Vanstone and J. D. Marshall.* Contrasting flooding histories of Mississippian carbonate platforms revealed by marine alteration effects in palaeosols
843 *A. D. George, P. E. Playford, C. McA. Powell and P. M. Tornatora.* Lithofacies and sequence development on an Upper Devonian mixed carbonate-siliciclastic fore-reef slope, Canning Basin, Western Australia
869 *A. S. Anastas, R. W. Dalrymple, N. P. James and C. S. Nelson.* Cross-stratified calcarenites from New Zealand: subaqueous dunes in a cool-water, Oligo-Miocene seaway
893 *M. Feldmann and J. A. McKenzie.* Messinian stromatolite-thrombolite associations, Santa Pola, SE Spain: an analogue for the Palaeozoic?
915 *B. Pittet and G. E. Gorin.* Distribution of sedimentary organic matter in a mixed carbonate-siliciclastic platform environment: Oxfordian of the Swiss Jura Mountains
939 *F. Massari.* High-frequency cycles within Pleistocene forced-regressive conglomerate wedges (Bradanic area, southern Italy) filling collapse scars
959 *J. E. Stout and T. M. Zobeck.* Intermittent saltation
971 Forthcoming papers

NUMBER 6

973 *A. Bhattacharya.* On the origin of non-tidal flaser bedding in point bar deposits of the river Ajay, Bihar and West Bengal, NE India
977 *A. Munnecke, H. Westphal, J. J. G. Reijmer and C. Samtleben.* Microspar development during early marine burial diagenesis: a comparison of Pliocene carbonates from the Bahamas with Silurian limestones from Gotland (Sweden)
991 *A. W. Archer and T. W. Johnson.* Modelling of cyclic tidal rhythmites (Carboniferous of Indiana and Kansas, Precambrian of Utah, USA) as a basis for reconstruction of intertidal positioning and palaeotidal regimes
1011 *T. Pässe.* Grain size distribution expressed as *tanh*-functions
1015 *R. Gonzalez and G. P. Eberli.* Sediment transport and bedforms in a carbonate tidal inlet; Lee Stocking Island, Exumas, Bahamas
1031 *J. W. Gibson and E. J. Hickin.* Inter- and supratidal sedimentology of a fjord-head estuary, south-western British Columbia
1053 *L. F. Montaggioni and G. Faure.* Response of reef coral communities to sea-level rise: a Holocene model from Mauritius (Western Indian Ocean)
1071 *J.-B. Pasquier and A. Strasser.* Platform-to-basin correlation by high-resolution sequence stratigraphy and cyclostratigraphy (Berriasian, Switzerland and France)
1093 *I. Klaucke, R. Hesse and W. B. F. Ryan.* Flow parameters of turbidity currents in a low-sinuosity giant deep-sea channel
1103 *C. McKenna Neuman, N. Lancaster and W. G. Nickling.* Relations between dune morphology, air flow, and sediment flux on reversing dunes, Silver Peak, Nevada
1115 *S. Bondevik, J. I. Svendsen and J. Mangerud.* Tsunami sedimentary facies deposited by the Storegga tsunami in shallow marine basins and coastal lakes, western Norway
1133 *M. W. Hounslow.* Significance of localized pore pressures to the genesis of septarian concretions
1148 Author index
1149 Forthcoming papers and Erratum
1150 Acknowledgments
1151 International Association of Sedimentologists statement of dues 1997
